

## Anesthesia Technician

Do you LOVE anesthesia and that's how you want to spend all of your time? Do you love utilizing all of your anesthesia knowledge and skills every day? Are you eager to teach your skills and knowledge to the next generation of veterinarians and technicians? The Purdue University Veterinary Teaching Hospital is looking to add enthusiastic veterinary technicians to our Anesthesia team. Our anesthesia technicians have the opportunity to manage anesthetic cases in both our small and large animal hospitals and work alongside 3 DACVAA, one veterinarian residency trained in Anesthesia/Analgesia, a DACVAA resident, and rotating interns.

With the opportunity to place multi-lumen central lines, arterial catheters, monitor direct blood pressure, calculate and manage multiple CRIs, and administer local anesthesia including epidurals, the anesthesia team is busy with both elective and emergency anesthesia. Worried about the large animal component? Our team is happy to train formerly small animal anesthesia technicians to increase their comfort level with horse, pig, sheep, goat, and cow anesthesia.

Purdue University, located in West Lafayette, Indiana, is a beautiful campus that supports both a College of Veterinary Medicine as well as an Associate and Bachelor degree program in Veterinary Nursing. All technicians in the teaching hospital teach and mentor students throughout the year. The anesthesia technicians work weekday dayshifts with rotating on-call responsibility for nights, weekends, and holidays. As a university employee, technicians are afforded a generous benefits package including medical/dental/vision insurance, paid time off, and retirement contributions. Purdue University is an EOE/AA employer. All individuals, including minorities, women, individuals with disabilities, and veterans are encouraged to apply.
