## Veterinary Technician or Assistant- MSPCA Shelter

***This is a full time; 40 hour a week position which includes Saturday.***

Can you imagine waking up each working day knowing that you're about to do some good in your community? We are looking for applicants who would love the opportunity to be a part of working in and establishing a Saturday canine spay/neuter clinic as an outreach to underserved Boston communities. This is a newly created **full time** position in our busy MSPCA Boston Shelter for a Technician or Assistant with experience in anesthesia monitoring for assisting with the procedures in high volume spay/neuter clinic.

If you have strong teambuilding skills and a collaborative personality to give guidance working with volunteer veterinarians and technicians these are the talents we are looking for.

Other functions of this position are assisting our Shelter Veterinarian with procedures and treatments required to maintain the good health of animals in our care as well as those animals who are part of our SNAP Spay and Neuter program. In addition, our Shelter Vet Assistant/Technician works with the general public relaying information of animal related situations and issues. It's important that applicants for this position are able to communicate effectively in a compassionate and positive manner.

This is your opportunity to join the MSPCA, one of the oldest and most respected humane organizations in the world. Working for an organization that clearly delivers on its mission of advancing the health and welfare of animals adds a wonderful dimension to delivering high quality veterinary service.

### **Requirements:**

Education: A minimum of an Associate's Degree from an accredited Vet Tech program or a related field such as Biology.

- To be hired as a technician, you must be a Certified Veterinary Technician.
- To be hired as an Assistant a qualified candidate must have a minimum of 2 years of veterinary surgery experience.
- **Applicants must have experience and confident skills in anesthesia monitoring.**
