

Unique opportunity for a SPECIALISTS IN DENTISTRY AND ANESTHESIA. We are looking for 2 or 3 individuals that are passionate about their specialty and patient care as well as being passionate about training other veterinary professionals. We want you to join one or both of our consulting and surgery practices in Nashville, TN(SEVDC) and Columbus, OH(MVDC). Both practices are privately owned dentistry and oral surgery specialty referral hospitals and education centers providing direct patient care while at the same time offering specialist level training and consulting in dentistry and anesthesia for our referring veterinarians and their staff. Led by a board-certified veterinary dentist with 30+ years of experience, Dr. Stein was the first veterinarian from both Tennessee and Ohio to become a specialist in Dentistry and Oral Surgery. We are looking for like-minded specialists who want to:

- Practice the highest standards of veterinary care
- Provide exceptional service to our clients, pets, and referring hospitals
- Share your expertise with other veterinary professionals
- Have a great work-life balance
- Be known as a leader in your community
- Be a part of building something special

What we want is personable, outgoing individuals that are passionate about what they do and how they do it. If your standards seem to always be higher than everyone else, we want you to join us. If you pay extraordinary attention to detail, we want you to join us. If you want to be part of an educational and training facility that also offers specialty care, we want you to join us.

The goal is to provide world class veterinary dental and oral surgical services as well as exceptional quality anesthesia services and education to our veterinary community, which extends throughout the Midwest and Southeast, but also across the country. We limit the number of cases we do each week so that we can give each patient our undivided attention and offer consultation, continuing education, and support to our partner practices.

An incomplete list of your duties would look like this:

- Provide dental and oral surgery services for referral patients in house and at referral clinics
- Provide balanced anesthesia and pain management services for referral patients
- Conduct wet labs and give lectures on an ongoing basis
- Provide in-house dental training for general practitioners
- Manage all day-to-day activities of the practice(surgical, anesthesia, dental, and training)

Tell us what equipment you want and we will provide it. We will also provide all the material support for you to share your expertise to the veterinary community. Bring your ideas and bring your knowledge, be a part of something special!

Our emphasis is on quality over quantity, and we want to provide a relaxed atmosphere for veterinary professionals to come train and learn under the guidance of some of the best specialists in the country. Monthly seminars and wet labs will be conducted in addition to in-house referral and mobile surgical services.

Our facilities are unique in that we aim to provide an experience that fosters camaraderie and support without the pressure of being lost in a large group. Training sessions will be limited in participants so that we can focus on the relationships. We also want to focus on the practical parts of our specialties so that our colleagues are immediately more comfortable with and more advanced with both oral surgery and balanced anesthesia without fear or hesitation.

The facility in Ohio is located in a 2300 square foot home that has been transformed and is located in the heart of one of the most eclectic suburbs of Columbus, within walking distance to restaurants, coffee houses, and boutique shopping. We are also minutes from the Columbus Zoo & Aquarium, with behind the scenes tours available to our CE participants. This facility can also provide lodging accommodations for up to six people, further enhancing the learning experience and providing a family atmosphere where relationships will be fostered. Our facility in Nashville provides a home like atmosphere as well. Both facilities operate on Fear Free principles when providing specialist care in our facility.

We have a long history of working with canine officers and working dogs(search and rescue, seeing eye) throughout the region, as well as pro bono work on multiple captive animals at both the Nashville Zoo and the Columbus Zoo & Aquarium.

Come and be a part of building your practice! Help decorate the space, manage the facility and CE schedule, provide support for veterinarians and veterinary staff, build your CE program, and make it your own! In addition to referrals from Ohio, Tennessee, Alabama, Kentucky, Indiana, Illinois, Pennsylvania, West Virginia, we will be providing world class wet labs and CE to veterinary professionals from all over the country.
