

VIRGINIA TECH.

ANIMAL CANCER CARE AND RESEARCH CENTER

VIRGINIA-MARYLAND COLLEGE OF VETERINARY MEDICINE

Virginia Tech's Animal Cancer Care and Research Center offers comprehensive, integrated services, including medical, surgical, and radiation oncology, for dogs and cats. The center is a state-of-the-art clinical and research facility representing hope for a brighter future in cancer care, and is located in the Virginia Tech Carilion Biomedical Research Addition in Roanoke, Virginia.

Illustrative of the college's commitment to working across disciplines to achieve optimal health for people, animals, and the environment, the center is a vital part of the Virginia Tech Carilion (VTC) Health Sciences Campus, adjacent to the VTC School of Medicine.

The new center, which accommodated the relocation and expansion of the oncology service from the college's Veterinary Teaching Hospital in Blacksburg, capitalizes on a strikingly rare opportunity to integrate researchers investigating human and veterinary biomedical interests that seek to advance cancer treatment in pets and people alike.

The Animal Cancer Center is hiring Licensed Veterinary Technicians to fill our Patient Care technician positions, as well as qualified, non-licensed candidates to fill our Veterinary Care Assistant positions. We have both full and part-time openings available. All positions are considered essential and may be required to report to work in emergency and authorized closing situations, as well as after-hours and weekend shifts.

For more information on these positions, please visit www.jobs.vt.edu. To apply, filter search results for jobs in the Roanoke area. Multiple job postings are available. For more information, please contact Deborah Akers, Practice Manager, at dsakers@vt.edu.
