

## Advanced Anesthesia Technician/Lead Anesthesia Trainer

### Are you a Credentialed Veterinary Technician with a passion for anesthesia and teaching?

Join BSVESS as a **Learning and Development Leader in Anesthesia**, where you'll play a key role in advancing clinical excellence across our emergency and specialty services.

We are seeking an **experienced Credentialed Veterinary Technician** to serve as an anesthetist in our busy and growing surgery department, while also coordinating and overseeing anesthesia-related clinical training for our veterinary support staff. This role blends hands-on anesthesia expertise with education, mentorship, and program development. You'll create lesson plans, deliver lectures, coach technicians on the floor, assess learning progress, and help shape the future of anesthesia practice within our hospital.

Our ideal candidate believes that **veterinary medicine is a team sport**—someone who values collaboration, professional growth, and delivering the highest level of care to patients and clients. If you hold a **VTS in Anesthesia or ECC**, or have extensive experience in critical care anesthesia (ideally under the supervision of an Anesthesiologist), have strong organizational and communication skills, and thrive in a supportive, fast-paced environment, we'd love to meet you.

### Position Overview

The anesthesia technician is responsible for monitoring anesthetized patients across a wide range of specialty services—from stable patients undergoing elective diagnostic procedures to critically ill patients requiring lifesaving surgery. This role offers a high level of autonomy and the opportunity to continually develop advanced anesthesia and nursing skills.

Anesthesia technicians work closely with surgeons, oncologists, and the Emergency & Critical Care (ECC) team to ensure optimal patient outcomes.

### Essential Functions & Responsibilities

- Set the standard for professionalism, patient care, and client service
- Coordinate, organize, and lead anesthesia-focused training programs
- Train and mentor veterinary staff in technical skills and industry best practices
- Assess staff skill levels and develop tailored training plans

- Evaluate anesthetic risk and anticipate patient needs
- Administer medications, fluids, CRIs, analgesics, and blood products as indicated
- Accurately calculate medication dosages and fluid boluses
- Perform IV catheter placement, anesthetic induction, and endotracheal intubation
- Utilize advanced monitoring equipment and respond appropriately to patient parameters
- Operate anesthetic ventilators, rebreathing, and non-rebreathing systems
- Provide thorough post-anesthetic patient care

### **Qualifications**

- 5+ years of experience in a specialty and/or emergency veterinary setting
- Associate degree in Veterinary Technology or related field
- Active veterinary technician license required (VTS in Anesthesia or ECC strongly preferred)
- Excellent interpersonal, verbal, and written communication skills
- Strong veterinary knowledge and technical skill set
- Compassionate, patient-focused mindset
- Ability to work independently and collaboratively
- Strong organizational, multitasking, and prioritization skills
- Ability to remain calm and effective in high-stress situations

### **Benefits and Perks (for Full Time)**

- Employer paid medical insurance premiums, AND paid deductible for employees!
- Medical, Dental, and Vision insurance options
- 401K with company match
- Complimentary Life Insurance \$25,000
- Personal Pet Discounts
- PTO and Holiday pay
- Company Sponsored Employee Assistance Program (EAP)
- Veterinary Social Worker on-site
- Ample paid CE opportunities on-site, as well as CE stipend for Certified Technicians
- Performance, skills, and compensation review every 6 months
- Snacks delivered to the break room on weekends
- Catered lunch and dinner on holidays and (summer) weekend shifts
- Uniform allowance
- Competitive Pay:
  - CVT \$30 to \$35
  - VTS \$34 to \$39
