Surgery Anesthesia & Analgesia VTS

We Love Pets and People. Bellevue Veterinary Emergency and Specialty Hospital was established with one goal in mind: to be there for pets and their people. We know emergency visits aren't planned and navigating specialty care can be overwhelming. We are looking for dedicated team members to join our growing team and help us implement people-centric processes to create an environment where pets receive world class care and pet parents receive clarity and compassion at every step in the process.

At Bellevue Veterinary Emergency + Specialty, we work hard to deliver unparalleled care and experiences for our patients and clients. Providing fulfilling careers and enabling healthy work-life harmony aren't talking points for us, they're part of who we are. We listen to our staff to understand what matters most, and work to ensure everyone has the support they need to thrive.
